- How to Set the Keyboard Layout to English (US)

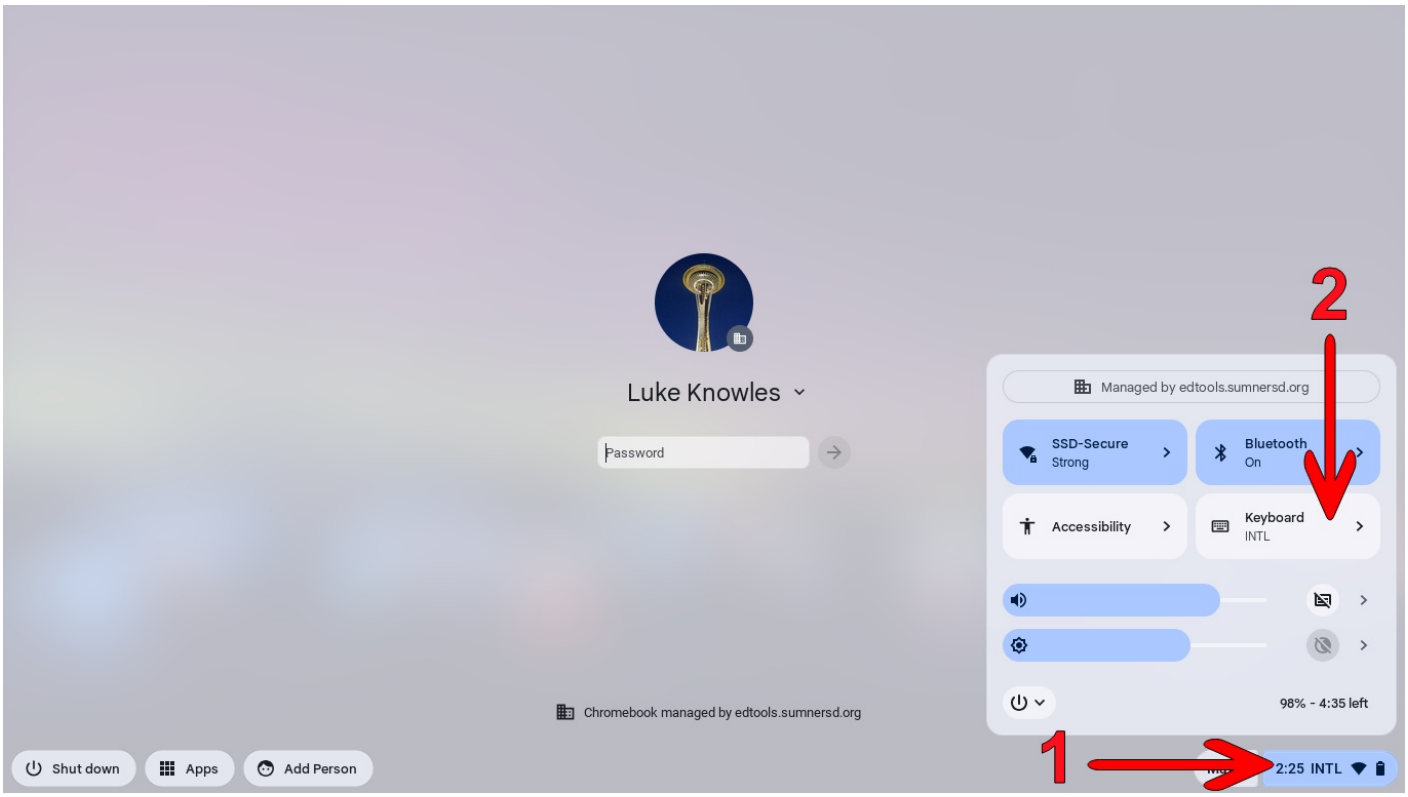

How to Set the Keyboard Layout to English (US)

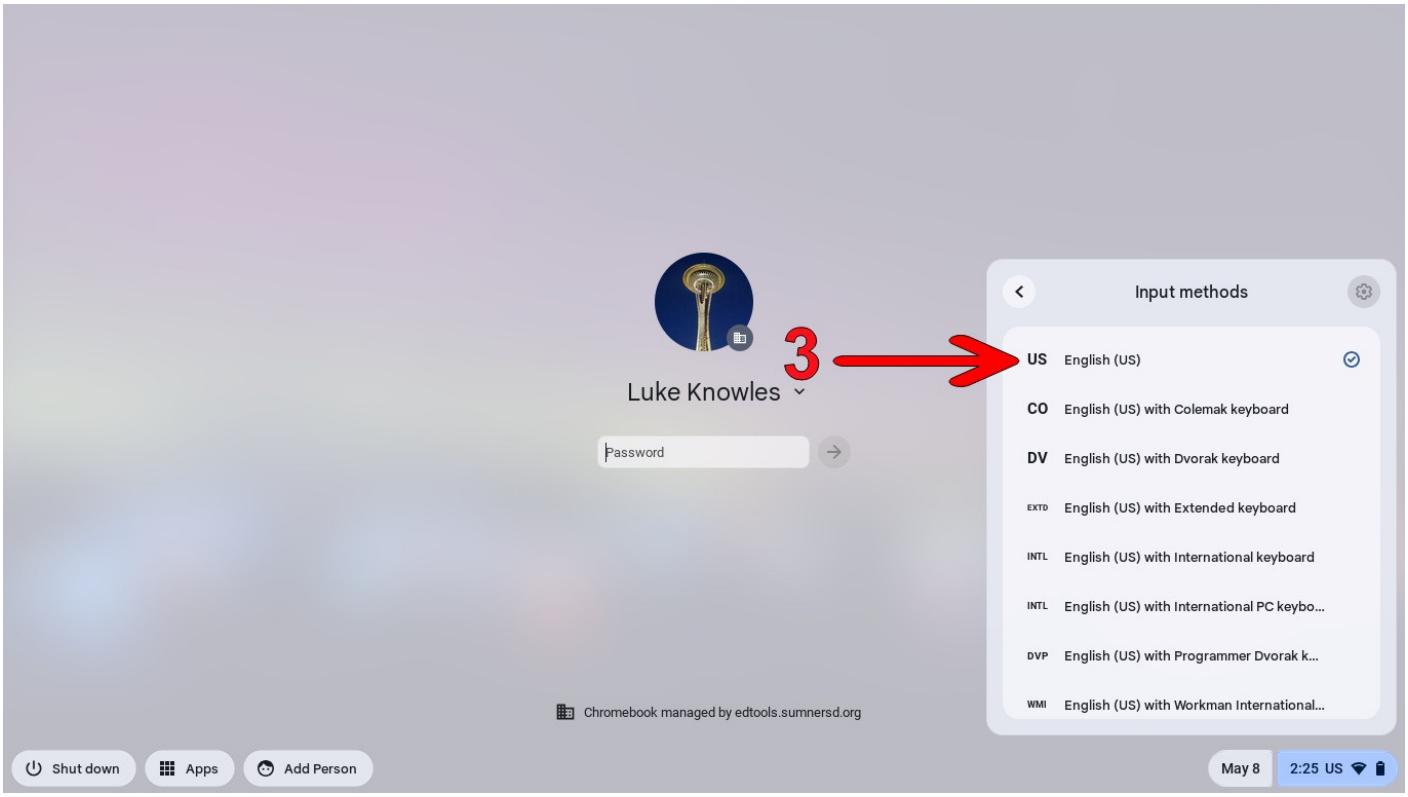

> **These instructions have been migrated to the Technology Services department's new documentation platform. Please refer to this link to keep up with the most up-to-date instructions and information. The content on this page is no longer maintained and will be removed in the near future.**

1) While at the sign-in screen, click the system tray located in the bottom-right corner

2) Click the Keyboard menu button

3) Select the English (US) keyboard option

It's easy to accidentally change the keyboard layout through shortcuts without even realizing it! If your Chromebook's keyboard layout gets changed back unintentionally, try pressing the `CTRL` + `Space` keys to swap between the 2 most recent layouts.
