

How To Setup 2FA

These instructions have been migrated to the Technology Services department's new documentation platform. Please [refer to this link](#) for up-to-date instructions and information regarding MFA. The content on this page is no longer maintained and will be removed in the near future.

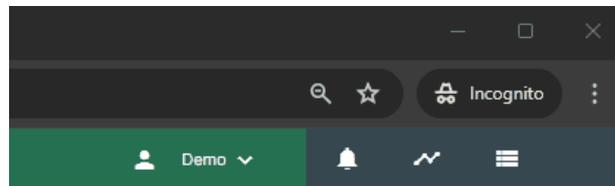

Two-Factor Authentication Methods

The Technology Services department officially recommends the **TOTP** method for staff - we consider it the most balanced option in terms of security and convenience

Name	Description	Requirements
SMS	A temporary code is delivered to your phone via text message	<ul style="list-style-type: none">• A mobile phone• A mobile phone number entered in your RapidIdentity profile
□ TOTP (<i>time-based one-time password</i>)	A temporary code which is continuously generated by an app on your phone	<ul style="list-style-type: none">• A mobile phone• An authenticator app such as Google Authenticator installed on your phone
WebAuthn	A USB security key which is plugged in to your device	<ul style="list-style-type: none">• A physical hardware key, such as a YubiKey

How to Edit Your RapidIdentity Profile

1. Log in to [RapidIdentity](#)
2. Click on your name in the top-right corner
3. Select **Profile Settings** from the dropdown
4. Click the **Edit** button
5. Make any changes according to the instructions for your preferred authentication method below
6. Click the **Save** button

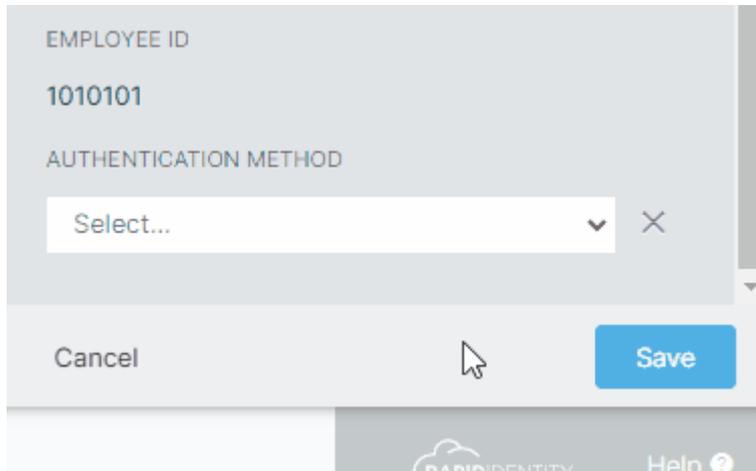

Authentication Method Setup Instructions

TOTP

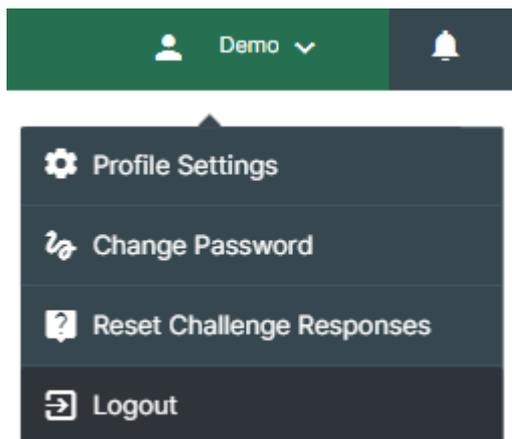

TOTP Instructions

1. Select **TOTP** from the **Authentication Method** dropdown, then click the **Save** button

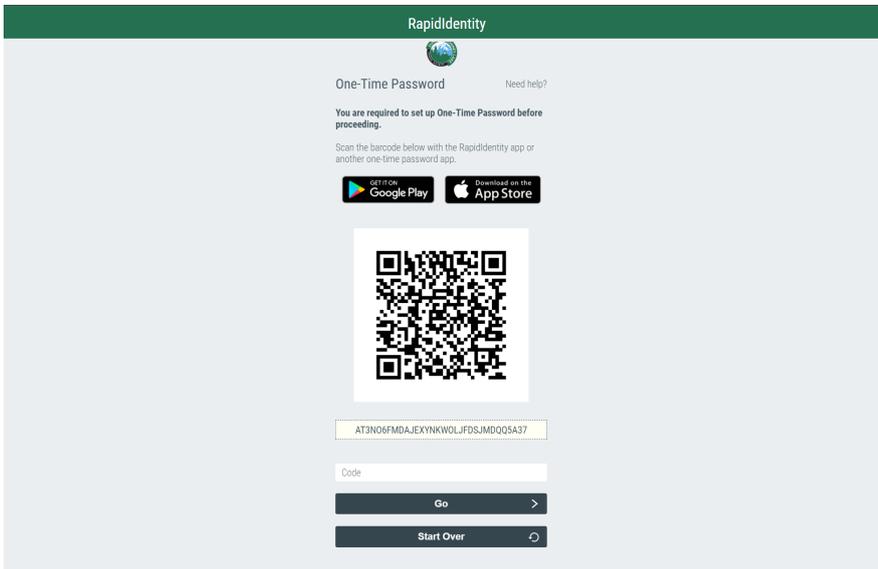

A screenshot of a web form for configuring TOTP. The form has a light gray background. At the top, it says "EMPLOYEE ID" followed by the value "1010101". Below that, it says "AUTHENTICATION METHOD" followed by a dropdown menu with "Select..." and a small 'x' icon to its right. At the bottom of the form, there are two buttons: "Cancel" on the left and "Save" on the right. The "Save" button is blue. Below the form, there is a footer with the "RAPIDIDENTITY" logo and a "Help" link with a question mark icon.

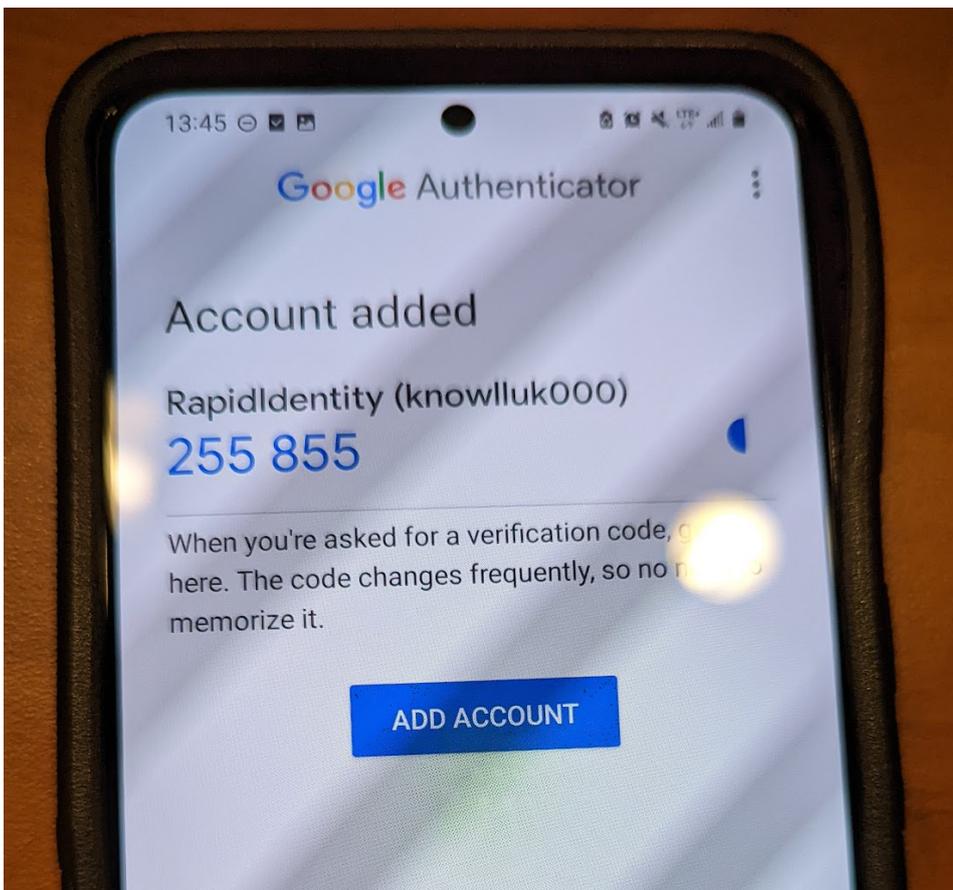

2. Log out of RapidIdentity, then log back in

3. After entering your credentials, you will receive the following prompt

4. Open the Google Authenticator app on your phone. Select the **Scan a QR code** option, then scan the QR code displayed by RapidIdentity
5. Google Authenticator will add the account and begin generating one time codes

6. In RapidIdentity, type in the code with is currently shown by Google Authenticator, then click the **Go** button
